## TECHCORR EXPANDS GLOBAL PRESENCE, NEW OFFICES IN MEXICO

**Pasadena, TX April 19, 2009** — TechCorr USA, LLC announced the opening of its new offices in Colonia Granada and Villahermosa, Mexico to meet the increasing demand for inspection and engineering services within Mexico

The new facilities will serve all of Mexico and is a further demonstration of TechCorr's commitment to the on-going investment in the region and the company's emphasis on building on our tradition of service excellence and attention to clients' needs.

Mexico is one of TechCorr's fastest growing markets, and this expansion will serve to further enhance the convenience and efficiencies in supporting the demand from its existing clients and the growing Mexico market. "Even considering recessionary conditions world wide the Mexican market is on of only several to continue investment in their oil and gas infrastructure. TechCorr wants to be a part of Mexico's success in increasing the reliability of their assets through state of the art technology, quality personnel and proven experience, " said Vincent Summa, CEO and President.

Mexico's office addresses are:

### **About TechCorr USA, LLC:**

TechCorr is a complete one-stop service provider of inspection services to the energy, processing & power industries worldwide. Our customers rely on TechCorr for their inspection and reliability engineering needs – on stream (resident), turnaround, quality assurance, and capital projects. TechCorr's field-proven, field- tested technology, proven implementation process, non-destructive testing methods and strategies have been developed to detect and prevent the compromise of critical company assets. TechCorr's inspection services involve material testing and examination of structures to ensure that the materials, components, and fabricated installations meet required specifications. Nondestructive evaluation provides information on the integrity and homogeneity of materials. Mobile inspection facilities enable these services to be undertaken at any location worldwide. TechCorr's focus is on applying advanced inspection techniques to increase our clients' confidence and the reliability of results to reduce their overall project costs.
