TechCorr's Safety Program promotes effective worksite-based safety and health. TechCorr recognizes that the success and growth of the company depends on the safety and health of its employees. It is with this concept that the company has dedicated its efforts to ensure that this paramount endeavor is practiced. It is believed that all accidents / incidents, property damage and environmental issues are preventable.

This type of safety mentality has allowed TechCorr to work over 15 years without a Lost Time Incident and over 10 million man-hours without a Lost Time Incident.

Please find below our current safety stats.
